

334 – Core Solutions of Microsoft Skype for Business 2015/2019

Microsoft Official Courses (MOC)

Course 20334C: Core Solutions of Microsoft Skype for Business 2015/2019

About this Course:

- This course provides students with the knowledge and skills that are required to plan, deploy, configure, and administer a Skype for Business 2015 solution. Students will learn how to deploy a multi-site and highly available Skype for Business infrastructure that supports instant messaging, conferencing, Persistent Chat, archiving, and

monitoring. Students will also learn how to manage and maintain the infrastructure and how to troubleshoot issues that might arise. This course focuses primarily on an on-premises Skype for Business deployment, but it does include information on how to integrate an on-premises deployment with Skype for Business Online and how to migrate from previous versions of Lync Server. This course helps students prepare for Exam 70-334.

Course Goals/Skills:

- Design and architecture of Skype for Business Server
- Installing and Implementing Skype for Business Server
- Administering Skype for Business Server
- Configuring Users and Clients in Skype for Business
- Configuring and Implementing Conferencing in Skype for Business
- Implementing Additional Conferencing Options in Skype for Business Server
- Designing and Implementing Monitoring and Archiving in Skype for Business
- Deploying Skype for Business External Access
- Implementing Enterprise Voice in Skype for Business Server
- Implementing High Availability in Skype for Business
- Implementing Disaster Recovery in Skype for Business
- Implementing a Skype for Business Server and Office 365 Hybrid Deployment
- Planning and Implementing a Migration to Skype for Business Server or Microsoft Teams

Audience:

- The primary audience for this course is information technology (IT) professionals who are responsible for the Skype for Business deployment in their organizations. Experience with previous versions is beneficial but not required for students taking this course. Students should be proficient with Active Directory Domain Services (AD DS), data networks, and telecommunications standards and components that support the configuration of Skype for Business. Students should also be familiar with Microsoft Exchange Server and Microsoft 365. The secondary audience for this course includes IT professionals who are planning to take the exam 70-334: Core Solutions of Skype for Business 2015 as a stand-alone exam or as part of the requirement for the Microsoft Certified Solutions Expert (MCSE): Communications certification exam.
