Prerequisites:

- Working knowledge of UNIX and/or Windows operating systems
- Working knowledge of Networking TCP/IP
- CCSE training/certification
- Advanced knowledge of Check Point Security products

This Class will teach you how to pass the following exams:

- **156-585 – Check Point Certified Troubleshooting Expert (CCTE)**
- След този курс може да се сертифицирате в нашия тест център.

Course Objectives:

Understand how to use Check Point diagnostic tools to determine the status of a network.

□ Understand how to use network packet analyzers and packet capturing tools to evaluate network traffic.

□ Become familiar with more advanced Linux system commands.

□ Obtain a deeper knowledge of the Security Management architecture.

□ Understand how the Management database is structured and how objects are represented in the database.

□ Understand key Security Management Server processes and their debugs.

□ Understand how GuiDBedit operates.

□ Understand how the kernel handles traffic and how to troubleshoot issues with chain modules.

□ Understand how to use the two main procedures for debugging the Firewall kernel and how they differ.

□ Recognize User mode processes and how to interpret their debugs.

- Discuss how to enable and use core dumps.
- Understand the processes and components used for policy installs and processing packets in Access Control policies.
- Understand how to troubleshoot and debug issues that may occur with App Control and URLF.
- Understand how to debug HTTPS Inspection-related issues.
- Understand how to troubleshoot and debug Content Awareness issues.
- Understand how IPS works and how to manage performance issues.
- Understand how to troubleshoot Anti-Bot and Antivirus.
- Recognize how to troubleshoot and debug Site-to-Site VPN-related issues.
- Understand how to troubleshoot and debug Remote Access VPNs.
- Understand how to troubleshoot Mobile Access VPN issues.
- Recognize how to use SecureXL features and commands to enable and disable accelerated traffic.
- Understand how the server hardware and operating system affects the performance of Security Gateways.
- Understand how to evaluate hardware configurations for optimal performance.
