

CCSA – Check Point Certified Admin (CCSA) R80.x

156-215.80 – Check Point Certified Admin (CCSA) R80.x

There's a new version of this course. The current course will expire on 31 of March 2021. Please enroll into the new version.

About this Course

- Three-day course covers everything you need to start-up, configure and manage daily operations of Check Point Security Gateway and Management Software Blades systems on the GAIa operating system.

Course Goals/Skills

- Install R80 management and a security gateway in a distributed environment
- Configure objects, rules, and settings to define a

security policy

- Work with multiple concurrent administrators and define permission profiles
 - Configure a Virtual Private Network and work with Check Point clustering
 - Perform periodic administrator tasks as specified in administrator job descriptions
 - Be prepared to defend against network threats
 - Evaluate existing security policies and optimize the rule base
 - Manage user access to corporate LANs
 - Monitor suspicious network activities and analyze attacks
 - Troubleshoot network connections
 - Implement Check Point backup techniques
-

Intended Audience

- Technical professionals who need to deploy and manage Endpoint Security within their security environment.
-

Course Format

**Classic – Classroom
Training**

**Live Virtual (Online)
with Instructor**

Language: English or Bulgarian

Course Materials: Digital Format. Lifetime Access. Official Learning Material from Check Point.

Lab: Individual Environment for each Delegate.

All Session
Recordings (24/7)

Certificate of
Course Completion

Course Duration

- 3 working days (09:00 – 17:00 / 9:00 am – 5:00 pm) UTC +2 (contact us for another Time Zone)

or

- **24 learning hours after hours (2 weeks, classes are held 2 times a week in one of the following options):**
 - Sat. and Sun. 10:00 – 14:00 or 14:00 – 18:00 or 18:00 – 22:00
 - Mon. and Wed. 19:00 – 23:00
 - Tue. or Thu. 19:00 – 23:00

Payments

[You can enroll with your Check Point Learning Credits.](#)

We provide Invoices for Company Sponsored Trainings.

Invoices can be requested up to 7 days after the payment.

All classes are confirmed individually after enrollment.

Course Prerequisites

- Basic knowledge of networking
 - 6 months to 1 year of experience with Check Point products recommended
-

This Training will Prepare you to take the following Certification Exams (exam price included)

• Check Point Certified Admin (CCSA) R80.x

- You can Certify Online or at our Test Center.
-

Course Objectives

Explain how Endpoint Security works to enforce corporate security compliance for end users and their devices.

Become familiar with the Check Point Endpoint Security Solution architecture and how it integrates with Check Point Network Security Management.

Identify and describe key elements of the SmartEndpoint Management console.

Discuss Endpoint Security Software Blade options and how they are managed from the SmartEndpoint Management console.

Explain how to create and assign security policies for Endpoint clients using Endpoint Security.

Understand deployment methods and server considerations for Endpoint Security Management installation.

Identify the different ways to install and configure Endpoint clients.

Recognize how to configure VPN connectivity to allow clients connecting outside of the network perimeter to securely access corporate resources.

Understand how Endpoint Security authenticates and verifies clients connecting to the Endpoint Security Management Server.

Describe additional server configurations that are available to help manage Endpoint clients.

Recognize the different types of data security protections available to deploy on end user machines.

Describe how Full Disk Encryption technology protects and recovers data accessed and stored on Endpoint computers.
Understand how to secure removable media devices.
Become familiar with the Remote Help tool and how it supports clients experiencing FDE and Media Encryption issues.
Recognize the types of threats that target Endpoint computers.
Describe Check Point SandBlast Agent and how to deploy it in the Endpoint Security environment.
Explain how SandBlast Agent technology prevents malware from infiltrating Endpoint machines and corporate resources.
Identify SmartEndpoint reporting tools used to monitor and respond quickly to security events.
Understand how to troubleshoot and debug issues.
