

Excel 2013/2016 Programming with VBA

Course: Excel 2013/2016 Programming with VBA

About this Course:

- This course has been created for anyone who works with Excel and wants to automate most of their tasks. The course covers procedural programming in VBA. Students will learn which objects are available in Excel and how to use them. They will also learn how to write their own worksheet functions, debug programs and write complete applications using VBA forms. This course can also be run in more depth, and with more practical examples, as a three day course

Course Goals/Skills:

- discuss the elements of human logic manifest in Excel's

user interface, and some of the ways those elements manifest in Excel VBA

- implement those elements in VBA functions and VBA macros for Excel
- describe the Microsoft Excel Object Model and VBA concepts
- begin to catch errors with basic debugging

Audience:

- Managers, Advanced Excel Users
