

ISO 22000 Lead Implementer

ISO 22000 Lead Implementer (PECB)

About this Course:

- The age of globalization has brought new challenges to all industries, and the food industry is no exception. The origin and safety of food products is a main concern in today's market. It has become increasingly difficult to have proper knowledge on the production methods and origin of food products. Internationally recognized food safety measures are no longer a privilege; they have become a basic requirement for all organizations that deal with food production or service.

The implementation of a food safety management system (FSMS) is a strategic decision for ensuring the safety of food delivered to the consumer. This training course, developed by PECB, aims to help participants develop the knowledge and skills necessary to support an organization in establishing, implementing, managing, and maintaining an FSMS based on ISO 22000 and other

best practices. Implementers play a key role in an organization's ability to successfully implement and maintain an FSMS.

The training course enables you to help organizations establish processes needed to maintain the quality and safety their products and services, while adhering to all legal, regulatory, and other requirements. As part of this training course, you will learn how to establish controls that proactively prevent noncompliance and contribute to the creation of a culture of safety, integrity, transparency, and openness.

The training course is followed by the certification exam. If you pass, you can apply for the "PECB Certified ISO 22000 Lead Implementer" credential. The "PECB ISO 22000 Lead Implementer" certificate is internationally recognized. It validates your professional capabilities and competences to implement an FSMS in an organization based on the requirements of ISO 22000.

Course Goals/Skills:

- Gain a comprehensive understanding of the concepts, approaches, methods, and techniques used for the implementation and effective management of an FSMS
- Acknowledge the correlation between ISO 22000 and other standards and regulatory frameworks
- Gain the ability to interpret the requirements of ISO 22000 in the specific context of an organization
- Develop the necessary knowledge and expertise to support

an organization in effectively planning, implementing, managing, monitoring, and maintaining an FSMS

- Acquire the expertise to advise an organization in implementing FSMS best practices

Course Format:

	
Присъствен (Classroom) Курс в Учебната ни зала или В Офис на Клиент	Онлайн (Online/Virtual) Курс във виртуална зала с инструктор

Course Language Option:

	
Български (Bulgarian)	Английски (English)

You can choose the language in which the training will be conducted – Bulgarian or English. All our instructors are fluent in English.

Student Guides:

The training materials are available in electronic format. They can be used online / offline on any device. Lifetime access.

Lab Environment:

Each student has their own lab environment where the exercises are conducted, part of the course. You do not need to install software on a computer or special hardware requirements. Participants in a face-to-face format in our Training Center have an individual computer during the training.

At Course Completion:

	
Lifetime Access - Video Archive 24/7	Certificate of Course Completion

Lifetime access to a video archive with recording of each individual lecture.

Official internationally recognized certificate for completed training course.

Course Duration:

- 5 working days (09:00 – 17:00)

or

40 hours training (theory and practice) in non-working hours lasting 4 weeks

Saturday and Sunday 10:00 – 14:00, 14:00 – 18:00, 18:00 – 22:00

Monday and Wednesday 19:00 – 23:00

Tuesday and Thursday 19:00 – 23:00

Payments:

An application for an invoice shall be accepted at the time of entry of the relevant course.

An invoice is issued within 7 days of confirmation of payment.
