

# ISO 50001 Introduction

## ISO 50001 Introduction (PECB)

### ISO 50001 Energy Management System Trainings

---

#### About this Course:

- As an international standard, ISO 50001 specifies the requirements for organizations to develop, implement, and improve Energy Management Systems. This allows organizations to follow a specific framework that helps them achieve continual improvement in energy performance, efficiency, usage, and consumption. This framework specifies the measurements, documents, and reports, which enable organizations to monitor the progress of their processes and employees towards energy performance. ISO 50001 requires organizations to establish new policies for an efficient use of energy, to set aims and objectives to meet those policies and review their impacts; genuinely attempting to achieve continuous improvements of

energy management

ISO 50001 Introduction training course enables you to comprehend the basic concepts of an Energy Management System (EnMS).

By attending the ISO 50001 Introduction course, you will understand the importance of an Energy Management System and the benefits that businesses, society and governments can obtain.
