

Lead Cloud Security Manager

Lead Cloud Security Manager (PECB)

About this Course:

- The Lead Cloud Security Manager training course enables participants to develop the competence needed to implement and manage a cloud security program by following widely recognized best practices.

The growing number of organizations that support remote work has increased the use of cloud computing services, which has, in turn, increased the demand for a secure cloud infrastructure proportionally.

This training course is designed to help participants acquire the knowledge and skills needed to support an organization in effectively planning, implementing, managing, monitoring, and maintaining a cloud security program based on ISO/IEC 27017 and ISO/IEC 27018. It provides a comprehensive elaboration of cloud computing concepts and principles, cloud computing security risk management, cloud-specific controls, cloud

security incident management, and cloud security testing.

The training course is followed by the certification exam. If you successfully pass it, you can apply for a “PECB Certified Lead Cloud Security Manager” credential. A PECB Lead Cloud Security Manager Certificate demonstrates your ability and competencies to manage a cloud security program based on best practices.

Course Goals/Skills:

- Gain a comprehensive understanding of the concepts, approaches, methods, and techniques used for the implementation and effective management of a cloud security program
 - Acknowledge the correlation between ISO/IEC 27017, ISO/IEC 27018, and other standards and regulatory frameworks
 - Gain the ability to interpret the guidelines of ISO/IEC 27017 and ISO/IEC 27018 in the specific context of an organization
 - Develop the necessary knowledge and competence to support an organization in effectively planning, implementing, managing, monitoring, and maintaining a cloud security program
 - Acquire the practical knowledge to advise an organization in managing a cloud security program by following best practices
