

LFS300 – Linux Foundation – Fundamentals of Linux

LFS300 – Linux Foundation – Fundamentals of Linux

About This Course:

- Linux powers nearly all of the world's supercomputers, most of the servers powering the Internet, the majority of financial trades worldwide and billions of Android devices. In short, Linux is everywhere. This instructor-led course will give you a good working knowledge of Linux, from both a graphical and command line perspective, allowing you to easily navigate through any of the major Linux distributions.

.

Course Goals:

- This course will give you a good working knowledge of Linux, from both a graphical and command line perspective, allowing you to easily navigate through any of the major Linux distributions. You'll learn things like:
 - The history of Linux
 - How to install Linux
 - How to use the Graphical User Interface
 - How to control Linux using the command line
 - Basic Linux security
 - And much more!

This course is designed to work with a wide range of Linux distributions, so you will be able to apply these concepts regardless of your distro.

Audience:

- This class is designed for people who have little or no prior experience with Linux or Unix. System administrators, developers, architects, decision makers or new Linux users can all benefit from the content covered in this class, especially if they are looking to work with more involved topics such as Linux system administration, network management and enterprise system architecture.
