Prerequisites:

- Security best practices and industry security requirements

such as defense in depth, least privileged access, shared responsibility, and zero trust model.

- Be familiar with identity concepts such as authentication, authorization, and active directory.
- Have some experience deploying Azure workloads. This course does not cover the basics of Azure administration, instead the course content builds on that knowledge by adding security specific information.
- Some experience with Windows and Linux operating systems and scripting languages is helpful but not required. Course labs may use PowerShell and the CLI.

The course prepares for the following certification levels

- SC-300: Microsoft Identity and Access Administrator
You can be certified in our test center with a voucher with a discount on the price of the exam.
