Video Training 410 Installing and Configuring Windows Server 2012 R2

This course is part two of a series of three courses. Through this series you will gain the skills and knowledge necessary to implement a core Windows Server 2012, including Windows Server 2012 R2 infrastructure in an existing enterprise environment.

You will cover the necessary administrative responsibilities, such as implementing server images, user and group management with Active Directory Domain Services (AD DS) and Group Policy, remote access, network policies, data security, and monitoring and updating management. This course incorporates material from the Official Microsoft Learning Product 20411 and it can assist you in your preparation for Exam 70-411: Administering Windows Server 2012. Exam 70-411 is one of three exams needed for the MCSA: Windows Server 2012 certification.
